

Getting Started with Your Cannabinoid Ingredient Sample

Thank you for choosing Caliper! Our cannabinoid ingredients are designed for rapid go-to-market and scalable manufacturing across a wide range of food and supplement applications, and come with a complete set of required documents and claims substantiation. See our performance and quality for yourself!

Usage and Dosing of Your Caliper Sample

For best homogeneity, mix samples well into formulations prior to packaging. To ensure accurate dosing, please dose by weight and not by volume.

5% liquid and powder samples

Every **0.2g** of product equates to **10mg** of CBD

10% powder samples

Every **0.1g** of product equates to **10mg** of CBD

20% liquid samples

Every **0.05g** of product equates to **10mg** of CBD

Storage Conditions

Powders: Must be kept in sealed, air-tight packaging. Store in ambient (20°C), dry (50% RH) conditions, free from light, odors, and aromatic materials.

Liquids: Store in original packaging under ambient conditions (20°C), free from odors and aromatic materials. Refrigerate after opening; do not freeze.
